

## **Media and Technology**

The academic and operational activities in NOUN are driven by technology. Therefore, its digital policies serve as benchmarks for measuring the impact of media and technology necessary to support both academic and operational tasks within the institution. NOUN is committed to ensuring the availability of the necessary digital infrastructure to support academic and operational tasks, with assessments conducted against established standards to maintain quality and effectiveness.

The policy on digital infrastructure is utilized to evaluate its impact on the University's academic and operational tasks, ensuring alignment with institutional goals and optimizing the use of technology to enhance performance and efficiency.
